

PROFILE

Motivated and detail-oriented Front-End Web Developer with a strong focus on building responsive, user-friendly web applications. I have hands-on experience with HTML, CSS, JavaScript, and React, and a passion for creating clean, accessible, and visually engaging user interfaces.

I've developed and deployed several personal projects that highlight my ability to translate design into functional code while maintaining performance and usability. A collaborative team player, I bring strong problem-solving skills and a continuous drive to learn and improve.

While my core interest lies in front-end development, I also have a growing foundation in cybersecurity, which supports my aim to implement secure, modern web solutions
